Start with 4 drives and Grow to 8 drives Portable Storage System

* Backup Storage Options

Small Tree announces ZenBackup expandable storage solution. It is designed to be the target where primary storage is sent to for data archiving. You can start with 4x drives providing 32TB of backup storage and grow as you need it very easily by adding drives!

We send the system configured with 32 TB, and when you need to grow in the future we can provide up to 4x more matching drives to quickly install (less than 5 minutes). Contact our Fantastic ZenCare Support and we will configure the software to recognize the additional storage in moments!

ZenBackup uses the familiar software as our Performance Systems so connecting the Small Tree systems to the ZenBackup is a snap!

ZenBackup has 2x 10GbE Network ports for high speed backups. Direct connect to your ZenSTOR or network switch and go!

ZenBKP provides an expandable backup storage solution for your other TZ or ZS Storage Solutions from Small Tree. All we need to do is turn on SnapShots on your existing Small Tree system connect this system to your switch or Small Tree System and the data will be backed up to the Zen-BKP Server.

As an added network feature, Zen-BKP can also provide other network services, such as secure remote VPN connections to your office.
